DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 29 and 30 are rejected under 35 U.S.C. 102(e) as being anticipated by Kuzma et al. (Pub. No. 2003/0125785).

Kuzma et al. disclose a support member 20 of an elongate member 30 of a cochlear implant device comprising a first portion having a proximal end, a distal end, at least one electrode 22 supported thereon, and a lumen (the cavity of tubular member 12) for receiving at least a portion 31 of a second portion, wherein the first portion is insertable into the cochlea of an implantee, and further wherein the first portion supports said second portion (see Figs. 1 and 2A) during relative advancement of the second portion into a cochlea of the implantee.

In making the above rejection, the examiner has considered the intended use of receiving a portion of a second tissue stimulating portion having at least one electrode supported thereon, but has deemed such a recitation insufficient to saliently distinguish over the Kuzma et al. reference. The applicants are claiming a support member and not the combination of the support member and the second tissue stimulating portion. The

support member of Kuzma et al. is capable of supporting any elongated member with or without electrodes contained thereon.

Allowable Subject Matter

3. Claims 1-4, 6-10, 13 and 14 are allowed.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
